TARPON i180

AM722XAT/XWT

TARPON i180 series are the first Arctic LED flood lights designed to replace the high-power metal halide lamp. Through excellent application for many years, the fixture has become the well-known products in the industry. Continuous improvement and upgrade makes the product low power consumption, high lighting effect, and high brightness. Optional for warm white & cool white LED chips, a variety of optics beam angles, and equipped with industry-standard wireless receiver card, TARPON series offer a variety of lighting solutions for all kinds of large outdoor lighting projects.
