2 INSTALLATION

2.1 MOUNTING

- Embed the outer casing first before installing the fixture.

NOTE: The stainless steel cover should not exceed the ground..

Concrete
Drainpipe
Hardpan

3000kg

The fittings have been designed and tested to withstand a static load of 3000kg (based on the outer casing) for installation exclusively in pedestrian or bicycle areas.

Water resistance and drainage:

The inground fixture has an ingress protection rating of Ip67. This means that fixture can withstand immersion for 30 minutes and low-pressure water jets. However, it is not designed to withstand constant immersion. Immersion will encourage condensation inside the fixture: a valve in the base of the fixture equalizes pressure as the fixture heats up and cools down. The valve allows air into the fixture but prevents the entry of water. If this valve is under water while the fixture cools down, it will not be able to equalize the pressure in the fixture and humidity may be drawn past seals and into the fixture by suction. The following precautions apply:

- The base of the inground must not be submerged in water other than for very short periods. If in doubt about a particular site, consult a geotechnical engineer.
- It must be possible for water from rain, melting snow, flooding or other sources to drain out of the installation well or sleeve at least as fast as it can enter it.

2.2 POWER CONNECTIONS

The input wires of this product must tri-core ,as following :

2.3 SIGNAL CONNECTIONS

It is advised for greater stability that if over 20 units to be connected, or the total signal cable length is over 60 meters, a DMX signal amplifier should be used.

3.8 DIMMER

【DIMMER】

- Enter the **【DIMMER】** to select the dimmer work mode, press **【Enter】**
- When Dimmer is set to **【OFF】**, the Dimmer is linear.
- When selecting **【DIM1】**, **【DIM2】**, **【DIM3】** or **【DIM4】**, the Dimmer is nonlinear
- These 4 dimming modes have different soft and smooth dimming effects from fast to slow

3.9 STATIC

【STATIC】

- Enter the **【STATIC】** mode to create the programs
- Combine **【RED】**, **【GREEN】**, **【BLUE】** and **【WHITE】** to create an infinite range of colors
- Set the value of the **【STROBE】** **【0-20Hz】**
- The static setting will be valid when the fixture is powered again

3.10 SETTINGS

【COLOR】

- When **【RGB TO W】** is set to **【YES】**, the color is perfect white as the actual RGB values are adjusted to make white. When it is set to **【OFF】**, the RGB values are not adjusted and the output is most powerful. The **【RGB TO W】**'s parameter can be adjusted in **【CALIB】**.
- **【UC】** Function can compatible with the older version **【RGB】** to make color consistency.

【RESET】

- Enter the **【RESET】**, pass **【YES】** to reset all setting to the original factory setting
